Software Architecture Document

1. Introduction

1.1 Purpose

This document provides a comprehensive architectural overview of the system, using a number of different architectural views to depict different aspects of the system. It is intended to capture and convey the significant architectural decisions which have been made on the system.

1.2 Scope

The scope of this SAD is to show the architecture of the Cheetah application. Affected are the class structure, the use cases and the data representation.

1.3 Definitions, Acronyms, and Abbreviations

| | |

MVC Framework for Ruby on Rails <https://shijitht.files.wordpress.com/2010/09/mvc.png>

1.5 Overview

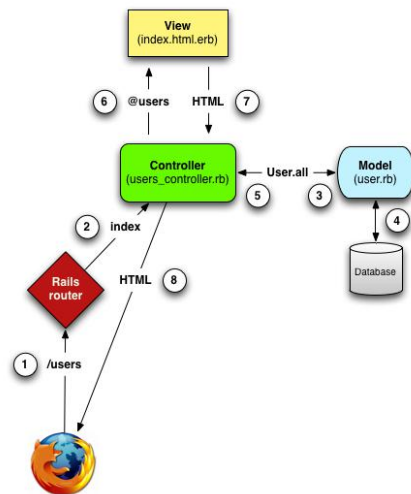

(n/a)

2. Architectural Representation

This project will use the MVC architecture, which Ruby on Rails can realize.

3. Architectural Goals and Constraints

The main goal of the MVC architecture is to separate the view from the logic. Therefore the view knows nothing on its own, but gets all information from the logical part. The Ruby on Rails framework automatically creates projects based on the MVC pattern.
